

# AirSep® FreeStyle™

PORTABLE OXYGEN CONCENTRATOR

## FREEDOM HAS A NEW LOOK

CAIRE introduces updates to the original lightweight portable oxygen concentrator — the AirSep® FreeStyle™. The new design adds features and benefits that will not only make the device more appealing to patients, but even more reliable for providers.

- **New Power Supply Connection**

Completely re-designed connector featuring **multi-directional installation** with **no pins to align** and **no release button to press** is simpler than ever to use. **Robust metal connection points** ensure the highest durability of both the power supply and FreeStyle for patients and provider alike.

- **New User-Replaceable Battery**

**Swap battery packs on the go** instead of waiting to re-charge an internal battery or having to add heavy external batteries. The battery pack will **re-charge anytime AC or DC power is connected** and is easily accessible from the front of the device.

- **Longer Battery Life**

The new battery pack provides an additional **1 hour of duration** at setting 2, providing up to **3 ½ hours with a single battery pack at setting 2.**

- **New Color Scheme**

New color scheme is **more appealing** and **non-medical** in appearance. The matte finish will help **resist everyday scratches.**
